

About Us :

At Varsha Engineers, we believe in creating compact, reliable & quality solutions. Since our founding in 1994, we have been committed to deliver high-quality products like Distribution Transformers, Oil-Immersed Combined CT-PT Metering Sets, Low Tension Current Transformers and CRGO Toroidal Cores that combine innovation with reliability.

Our Mission :

Our mission is to provide trusted transformer technology that empowers businesses, strengthens infrastructure and lights the way forward.

Our Vision :

To redefine energy transformation with cutting edge, eco-friendly solutions that drive progress across industries.

OUR PRODUCTS

OIL IMMERSED DISTRIBUTION TRANSFORMER

- At Varsha Engineers, we design and manufacture high-performance distribution transformers up to 22 kV class that meet global standards.

CT-PT COMBINED METERING SET

- We manufacture CT-PT from 11 kV to 33 kV voltage class which are engineered for precision-integrating current and potential transformers to provide reliable and accurate metering for high-voltage networks.

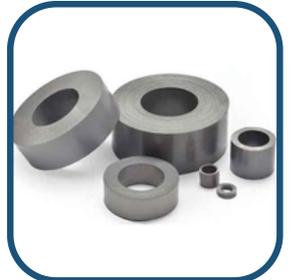

LOW TENSION CURRENT TRANSFORMERS

- Our LT Current Transformer are engineered for accurate measurement, reliable metering and can be designed in resin cast, tape insulated or varnish impregnated based on customer's requirements.

CRGO TOROIDAL CORES

- Our CRGO Toroidal Cores are built for low losses, superior magnetic performance and compact as per customer's design. Perfectly suited for CTs, PTs and various transformers.
